

IMBIBER BEADS® CONTAINMENT SHUT-OFF SYSTEM

Award-winning, point source control drain protection systems, allow water to pass, but automatically seal leak the path when contacted by compatible oils, fuels & solvents.

- NO moving parts
- NO electricy
- ELIMINATES human error

1 STEEL GRATE & FILTER

Large object and silt protection.

2 IMBIBER BEADS® SAND DISC

Filtration disc captures minor leaks/spills and also filters silt.

3 IMBIBER BEADS® PILLOWS AAT™

Three Imbiber Beads® Pillows change color in the presence of organic chemicals.

4 IMBIBER BEADS® SAND DISC

Filtration disc captures minor leaks/spills and also filters silt.

5 C-CLAMPS

Securely fasten Shut-Off disc to drain system.

6 SELF ADHESIVE GASKETING

Provides a liquid tight seal between shut-off disc and system's steel housing.

7 IMBIBER BEADS® SHUT-OFF DISC

Filled with IMBIBER BEADS® and engineered to allow water to percolate through, but automatically seal when contacted by compatible oils, fuels and solvents.

8 ELEVATED BASE

Protects shut-off disc during transport and system installation.
